

## IMPER-11

### DESCRIPTION

WATER REPELLENT FOR POLISHED GRES CERAMIC FLOOR

### CHARACTERISTICS

Water repellent system with modified silicon and synthetic resin base, used to waterproof the gres ceramic floor once it has been polished.

### SPECIFICATIONS

Aspect	Colourless liquid
Colour	Colourless
Density	0,83 gr/cm <sup>3</sup> aprox

### APPLICATIONS

The product application is aimed at making the gres ceramic floor water repellent once it has been polished. IMPER -11 use enables an easier cleaning process for fat stains, colouring and other kind of dirtiness. IMPER -11 fulfils the cavities originated by the polish process and avoids dirtiness to settle into them, easing the surface cleaning process.

### INSTRUCTIONS

The surface must be completely clean and dry prior to the use of the product. It must be applied through pulverization with a low-flow tip. The product reaches it best effectiveness 24 hours after its application. As a general standard, the quantity of the product needed can be calculated having as a reference 10 gr/m<sup>2</sup>. An extra consumption, origins a superficial tuning which can be removed with cleaning alcohol (methyl alcohol) or acetone.

For its hand application, use a roll, a brush or a mop, adding slightly a bit of water to the surface. 2 minutes after the application, clean the surface properly with a mop or a piece of cloth to remove "the superficial powder" left behind.

### RECOMMENDATIONS

It is recommended to use the product in ventilated premises and to avoid smoking.

### STORAGE

In closed containers, the product can be stored 12 months. Do not expose the product to 30°C or higher temperatures and avoid direct sunlight contact.

### PACKAGING

5, 25, 200 and 1000 litres containers.

### RISK & SAFETY PHRASES AND HAZARD SYMBOLS
